Cambridge Child Development Centre Inc.
Intensive Behavioural Intervention Providers

The Cambridge Child Development Centre is currently creating a new training program designed for parents who wish to learn about Applied Behavioural Analysis-based teaching techniques for children with Autism Spectrum disorders and other developmental disabilities.

The program will offer parents:

- Supervision of training from a Board Certified Behaviour Analyst (BCBA) and Child Psychologist
- Weekly training on child-specific goals/programming from a BCBA Senior Therapist
- Demonstrations of skills/programming from a trained Instructor Therapist
- A collaborative and child-centred approach
- A flexible curriculum that teaches parents the basic principles of Applied Behavioural Analysis and how to use this teaching approach to meet their child's individual needs
- A support network of parents enrolled in the program

To be eligible for the program, children must have a diagnosis of Autism Spectrum Disorder or other developmental disability. Parents must be able to make a commitment of time outside of training hours to implement programming with their child.
